evaluation

- i** Versatile IT infrastructure and technical solutions specialist with end-to-end ownership of complex, self-hosted deployments spanning omnichannel communication, AI, CRM, workflow automation, and data analytics. I combine deep hands-on engineering — deploying full stacks on bare VPS with Bash, Docker, and PostgreSQL — with strategic thinking around data sovereignty, cost optimization, and vendor independence. Promoted three times in under two years for delivering systems that serve multi-team, multi-country operations at scale. I thrive in environments where I can own the full problem: from architecture and deployment to integration, training, and crisis recovery.

📁 Work Experience

Discover Islam Society

IT Infrastructure & Solutions Specialist

📅 November 2024 – Present 📍 Bahrain

Promoted 3x

Currently overseeing all data operations and IT infrastructure for the organization.

📁 Infrastructure & Systems Architecture

- Single-handedly architected and deployed a **self-hosted omnichannel communication stack** (Chatwoot, NocoDB, Grafana, n8n, Botpress) on Hostinger, Contabo, and DigitalOcean VPS, eliminating reliance on third-party SaaS platforms
- Chose the self-hosted approach for **data integrity, data confidentiality, and full supply-chain control**, protecting operations from third-party disruptions and single-point-of-failure risks
- Managed the full deployment lifecycle: Bash scripting, YAML-based configuration, Docker container orchestration, PostgreSQL database administration, and Rails console maintenance
- Integrated **AI capabilities** across the omnichannel and CRM stack to automate responses, classify conversations, and surface actionable insights
- Built a **mobile-first web-based solution** for call center agents that synchronized data bidirectionally with the omnichannel platform
- Designed and deployed a dedicated **new Muslim care management system** to support post-outreach follow-up, engagement tracking, and ongoing support workflows
- Developed and launched the **corporate website within a single day**; later integrated Eazypay payment gateway, enabling a high-value donation transaction that became a milestone for the organization

🕒 Digital Marketing & Multi-Country Campaign Operations

- Managed **Facebook marketing campaigns across 20+ countries** with a managed budget of **3,000 BHD**, averaging **~800,000 monthly reach**
- Generated **525,301 conversations/leads over two years**; 44,542 individuals shared contact details and expressed interest in the organization's mission
- Secured **Facebook approval for a custom application** enabling the organization to receive, process, and serve messages directly from its own systems — bypassing platform lock-in
- Launched and managed TikTok video campaigns; currently integrating TikTok's API with the self-hosted omnichannel solution for unified multi-platform engagement

⚡ Strategic Impact & Crisis Management

- **Saved 8,000 BHD** by transitioning from proprietary systems to open-source solutions
- **Eliminated ~\$3,000 USD/year in recurring SaaS subscriptions** by consolidating tools under the self-hosted stack
- Initiated a **big-tech diversification strategy** that removed critical single points of failure — when Facebook unexpectedly blocked management account credentials, operations were swiftly revived with zero extended downtime
- Provided technical training and ongoing support to staff across local and offshore teams

LMRA Expat Protection Center

BPO Agent

📅 June 2020 – October 2024 📍 North Sehla, Bahrain

- Served as key communicator between clients and officials in multiple languages
- Generated comprehensive reports and summaries using CRM systems
- Provided real-time translation services both in person and during telephone conferences
- Explained detailed SOPs, service information, rules, and policies to clients
- Demonstrated excellent communication skills while handling grievances and providing counseling
- Adapted swiftly to client requirements and changing operational environments

Manara Media W.L.L.

Computer Programmer

📅 November 2018 – February 2020 📍 Muharraq, Bahrain

- Automated manual processes in HR and Operations including email responses, recruitment workflows, candidate evaluations, and project tracking
- Administered Google Workspace (G-suite) and provided support and training to employees
- Developed and automated workflows, SOPs, and templates using Google Apps Script
- Leveraged various Google APIs including event triggers, CSV data manipulation, and JSON processing
- Provided technical support and maintained company IT devices

🎓 Education

Chittagong Polytechnic Institute

Diploma in Computer Engineering

📅 January 2013 – December 2017 📍 Chittagong, Bangladesh

Four-year intensive diploma covering subjects equivalent to a BSc curriculum, including programming, networking, database systems, systems analysis, and software engineering.

International Open University

BSc in Information Technology — Relevant Coursework Undertaken

📅 March 2021 – 2023

Completed foundational and advanced coursework in IT. Discontinued to focus on professional career, where hands-on responsibilities now exceed the scope of the degree program.

 Technical Skills

Bash / Shell Scripting	Linux Server Admin
Docker & Compose	PostgreSQL
YAML Config	JavaScript
Node.js	VPS Deployment
Cloud Computing	Chatwoot
NocoDB	Grafana
n8n Automation	Botpress (AI Bots)
AI Integration	CRM Systems
Self-Hosted Solutions	Payment Gateways
Facebook Marketing API	TikTok API
Social Media Campaigns	Mobile-First Web Dev
Cost Optimization	Crisis Recovery
MS Office Suite	Adobe Creative Suite

Key Achievements

- **Saved 8,000 BHD + \$3,000 USD/year** by replacing costly proprietary and SaaS tools with a self-hosted open-source stack
 - **Promoted 3 times with pay raises** within 20 months, advancing to oversee all data operations and IT infrastructure
 - **Architected and deployed** a complete self-hosted omnichannel + CRM + AI ecosystem serving 3 cross-functional teams (local agents, offshore agents, management)
 - **525,301 conversations and 44,542 contacts** generated across 20+ countries through Facebook and TikTok campaign operations
 - **Built corporate website in 1 day** and integrated payment gateway, directly enabling a landmark donation transaction
 - **Eliminated single points of failure** through big-tech diversification; swiftly revived operations when Facebook blocked management credentials, avoiding extended downtime
 - Secured Facebook approval for a custom application that brought message processing in-house, reducing platform dependency
-
